Dear Ian

I have been in contact with an arboriculturist and he has advised that we do not need to tick the box to say that the tree is diseased and it is not in danger of falling down so could you please remove this from our application?

Good afternoon

In your application form you have ticked Yes to the question Condition of tree - eg. it is diseased or you have fears it might break or fail.

As it state in the form "If Yes your are required to provide written arboricultural advice or other diagnostic information from an appropriate expert"

If you ticked this in error, please let us know or supply the arboricultural information required. Once i have either of these i will be able to validate the application.

I have removed A1 and A2 trees from the application as theses are not covered by the TPO, based on the plan you provided.

Regards
Ian

Reference : 24/00680/TPO

I write with regard to the further information requested in the letter attached on the above email.

As per the guidance I sent a photo (photo labelled Tree G2 historic damage) to show the reason why the tree needs to have remedial work to it. This historic damage was identified by the tree surgeon we asked to advise us.

I attach the screen shot from his quote the work which shows his identification of the historic damage.

Regards

Claire Cowen

T2 - 1 x Dead Lime Tree - reduce to ground level
T3 - 1 x Oak Tree at rear - tip reduce all lateral limbs by up to 3m to reduce weight, reducing eventual failure of tree due to historic stem damage
T4 - 1 x Oak Tree - tip reduce lateral limbs towards patio by up to 2m to give clearance and remove lower major deadwood over garden
T5 - 1 x Oak Tree near shed - cut back all overhang to fence
Discount if all works carried out together
