Supporting information requirements					
Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.					
Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.					
Your local planning authority will be able to advise on the content of any assessments that may be required.					
Biodiversity net gain					
Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why they are exempt from doing so.					
Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.					
Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

Details of the pre-application advice received

Whilst the proposal does represent a sizeable increase in terms of both the GIA and the GEA compared to the original dwelling, the site has no constraints save for trees and given the size of the site, the proposal is considered to be generally acceptable in terms of its scale. The position of the proposed dwelling would remain, more or less within the existing position, however Officers would suggest that it is set in from the boundaries more (or at least along one edge). The overall design of the dwelling is acceptable and the maximum ridge height is acceptable, Officers would suggest that the proposed ridge height of 8.3m is the maximum height that would be accepted given the ridge heights of other dwellings within the immediate area and that the first floor section on the north-west side is reduced in height/bulk such that it would appear subordinate to the main part of the proposed dwellinghouse and allow for more spacing along this side.

- ii A significant amount of development would be sited along the north-west boundary of the site, which is common to neighbouring property, 24 Sunning Avenue. Consideration should be made to reducing the height and depth of this part of the development and to its positioning to achieve a more neighbourly development.
- iii There are some concerns over the impact the development would have on the existing trees, particularly with regards to their root protection zones and canopies along the boundary. The proposed dwelling should be positioned outside of the root protection zones entirely. Should an application be submitted, an Aboricutural Report including a detailed Tree Protection Plan demonstrating the impact of the existing neighbouring dwellings, proposed dwelling and the proposed location for utilities should be provided.
- 1.2 The Council would most likely support the proposal if an application were made however this would be subject to the impact on the existing trees and amendments to the design/scale as set out above.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
