

The XP Slide Panoramic door offers a contemporary design statement for the most discerning homeowner.

Minimal frame and maximum glass means we can offer the finest panoramic sliding door in the UK.

With a premium, architectural design our new panoramic sliding door system, the XP Slide Panoramic incorporates glass that is bonded to the frame, giving it a sightline of only 30 mm. The outer frame of the door is designed to be hidden by the wall, giving the appearance of uninterrupted glass for an effortlessly sleek finish. The visible profiles at the head and foot of the door are only 35 mm, meaning this truly is a glass sliding door.

We have also designed a lockable cylinder into the side jamb, meaning it is the only panoramic sliding door that meets UK building regulations without the requirement for an electronically, or magnetically operated lock.

XP SLIDE PANORAMIC
