Upon review of relevant recent guidance on the installation of EV charging points, a safety concern has been highlighted from insurers in circumstances where EV chargers are installed close to buildings.

Submitted with this application is a copy of the associated guidance from Zurich which states electric vehicle charging and parking should be located at least 10m from combustible walls or at least 7.5m from unprotected openings / extensive glazing in non-combustible walls. Given the confined nature of the courtyard at the Stanley Buildings, this criteria could not be met at the site.

Therefore, it is requested that Condition 7 is removed.

The applicant continues its commitment to supporting tackle the climate emergency on this project through a range of other initiatives, including, the introduction of ASHP's, roof PV's, insulation as part of the roofing works, improved window installation and replacing all M+E infrastructure, including lighting.
