## Hidcote Manor Garden Re-Thatching of Thatched Barn

Hidcote Manor Garden, Hidcote Bartrim, Chipping Campden, Glos  
GL55 6LR

### **Design**

The proposed works are relatively straightforward and involve the re-thatching of the half-hipped roof. Traditional materials will be used, including water-reed thatch for the main roof, combed wheat reed for the ridge, wooden spars, traditional felt roof membrane and chicken wire. The block ridge will be renewed to retain the existing pattern of scallops and diamonds.

### **Access**

The proposed repairs will have no impact on access once completed.
