

To Whom it May Concern,

I confirm that The Pump House, Lower Chedworth, GL54 4AJ was built by Thames Water in the 1960s and used as a water pumping station by Thames Water until 1985. It was then used on and off as a workshop and studio between approximately 1985 - 2020 by the previous owners who had purchased the building from Thames Water. This use has been continued by myself since I purchased the property in 2020.

Sincerely,

A solid black rectangular box used to redact the signature of Raphael Bliss.
