## BIO-DIVERSITY STATEMENT

The Pharmabox24 MIDI is a self-contained, secure, vandal-resistant, machine, measuring approximately 2.01 m tall, 1.108m wide and 1.062m deep externally, fitted securely into the elevation of the Surgery featuring the business logo, a monitor screen, credit card reader and collection flap. The collection flap is automatically locked when patients are not collecting the prescriptions.

The Doddington Medical Centre lies proximate to the grounds of Doddington Hospital of the western edge of the village of Doddington.

The proposed development does not affect any features of bio-diversity importance and sits within the confines of an existing building.
