To whom it may concern

With regards to this location all trees are intermingled and over a play park and at present there are two large oak trees that have failed in woodside and crashed through there play area and completely demolished the play area. So on the grounds of H&S I recommend that all these trees be removed on the grounds of preserving life in the event of tree failure

I have visited this site on numerous occasions and have given my professional advice on the trees at this location and have had correspondence with the management companies at this location, therefore I have no issues with authorising the works at this location.

Kind regards
Nick Conway
