Dear Dover District Council,

I am writing to express my explicit approval and support for Martin Thompson in their endeavour to install an Air-source Heat Pump, facilitated by Octopus Energy Services, at their residence located at 15a Felderland Close. As a neighbour residing in close proximity, I believe that this initiative aligns with the shared interests of our community and contributes positively to our environmental goals.

Air-source heat pumps are an eco-friendly and energy-efficient alternative for heating homes, reducing carbon footprint, and promoting sustainability. I have reviewed the proposed installation plans and am confident that it will be of no disturbance to myself.

I have had discussions with Martin Thompson and they have assured me that every effort will be made to adhere to noise regulations and planning requirements.

I believe that supporting initiatives like this aligns with our collective responsibility to embrace greener technologies and reduce our reliance on fossil fuels.

Therefore, I respectfully request that the council considers Martin Thompson's application for installation of the Air-source Heat Pump with Octopus Energy services favourably.

Thank you for your attention to this matter.

Sincerely,

Phil Dean
