

Services:
 It is confirmed that the existing agricultural holding is serviced by an existing SW water main and electricity supply. Sewage treatment will be enabled by installation of a Biodigestor Model TS61 treatment plant, which is confirmed produces the effluent quality required by SEPA, with outfall to existing 41/2" VC pipe connected to field drains. Storm water will discharge to the existing VC pipework with re-made connections and traps

General Improvements:
 Immediate:
 Existing Dutch barn and piggery buildings to be repaired and painted. Paddock/ yard areas to be cleared of all unnecessary, unsafe and redundant structures, impliments, machinery and general debris. Existing hard standing areas around small holding and access to be repaired and left tidy.

Prior Notification required by PDR Annex H - Class 18B:
 Conversion of Agricultural Building to Residential Use at: 10A Camptoun Holdings

Tiles:
 Sandoft Neo tiles have been used successfully in similar situations throughout the county and are chosen as they respect the original form and material used whilst combining the best of modern technology and ease of obtaining future components required to maintain the roof thus ensuring the longevity of the building.
