

## **94, BARGERY ROAD, SE6 2LW – REASONS FOR WORK STATEMENT**

Regarding the application to fell 2 x Conifer trees in the rear garden, the reasons for removing the trees are that their location within the garden is not ideal as they are causing an obstruction by making that area of the garden virtually unusable and as they are quite tall they also cause a lot of shading so nothing else will grow underneath, some of the branches have died and turned brown and will not regenerate any green foliage, much better use of that area of the garden could be made with the trees removed.
