Biodiversity net gain
Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why they are exempt from doing so.
Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.

Details of the pre-application advice received	
The current proposals represent an improvement on the previous scheme. Whilst the reduction	
in depth of the two storey rear element means some degree of 'gap' is preserved between the	
existing outriggers and this better retains the character and appearance and historic	
significance of the building, the proposals still result in less than substantial harm but at a low level.	
In order to be acceptable sufficient public benefits should be identified to offset this harm. The	
introduction of timber windows to the rear extensions is welcomed and would amount to a heritage gain. The details of these should be submitted as part of a formal application.	
nentage gain. The details of these should be submitted as part of a formal application.	

Authority Employee/Member
With respect to the Authority, is the applicant and/or agent one of the following:  (a) a member of staff  (b) an elected member  (c) related to a member of staff  (d) related to an elected member
It is an important principle of decision-making that the process is open and transparent.
For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
