Is the proposed development reasonably necessary for the purposes of agriculture?
⊘ Yes○ No
If yes, please explain why

The building is to provide a covered area for our dairy herd to feed under. Presently, they feed in an outdoor area. This means that rainfall is added to manure dropped on the area, increasing the volume that has to be managed, and increasing environmental risks. This is also a welfare issue for cows when they need to feed in wet or hot weather, a roof will provide shelter from rain, and shade in the extreme heat that is now regularly experienced in summer. The rainfall collected from the roof will instead be collected in tanks for livestock drinking, improving the sustainability of the business.
The project has the support of the local Catchment Sensitive Farming officer
