Attn Sophie Edwards,

Re: Planning Application 24/T/00070, Little Clandon, The Street, West Clandon, Guildford

Please see below further description of tree works at "Little Clandon".

Request works on 21x Lime trees (*Tilia*), previously pollarded approx 15 feet from ground. The trees Stand approx 40ft in height and the old pollard knuckles show signs of sever decay.

Reason for works:

Due to the close proximity of the adjacent school playground being a target area

Work required:

I would recommend reducing all trees by 3 - 4 m in height, branch cut diameter not to exceed 3cm, Reducing risk of stem failure at decayed pollard knuckles.

Also request works on 7 Ash trees (*Fraxinus*), along the same group line, approx 30ft in height, as The trees show signs of Ash dieback (*Hymenoscyphus Fraxineus*).

Reason for works:

Reduce risk of stem failure due to close proximity of adjacent school playground being a target area.

Work required:

I would recommend the trees be reduced by 3 - 4 m, branch cut diameter not to exceed 3cm.

Yours sincerely,

Mr C B Stone
