FAO Richard Morris,

Good evening,

Regarding the planning condition outstanding on Application no. 21/00794/FUL a concrete pad 3metres by 3metres will be constructed with concrete block walls 900 mm high to three sides of it to store the manure in. A contractor will then be employed to collect the manure at regular intervals to either recycle it or dispose of it at a licensed landfill site.

I trust that the above proposal is acceptable as we intend to start the project in two months time.

Kind regards,

A Gilman
