OFFICIAL

Hi Honor,

I've attached scans of all the forms and a picture of the concrete pad. It can also be seen on Google earth and I think on some of the documents I submitted on the Certificate of Lawfulness application.

Planning Statement.

I am looking to put an agricultural barn on the site of a previous barn that was granted planning in the early 80's and removed in 2020/2021 by previous owners due to disrepair. The barn will be used for the storage of agricultural equipment such as a tractor, roller, topper and various harrows or for the storage of hay and bedding as well as for livestock such as sheep. Although we already have a barn, I would like to be able to separate flammable materials from hay and bedding, and this barn being reinstated would mean I could keep the equipment in one barn, and hay/livestock in the other. The barn will be on the exact footprint of the previous barn, the concrete pad is still in place so there will be no disturbance of the ground. The site is also accessed by an already existing hardcore path so no soil damage will take place.

Hope this is everything you need,

Many thanks

Elizabeth
