

## Bee Brick® Green and Blue

...

An innovative nesting site for solitary bees, created to look lovely stood in your garden or on your balcony, the Bee Brick® can also be used in place of a standard brick in construction.

Solitary bees are facing a dramatic decline in numbers due to disease, an increase in chemical use and habitat loss. Pollinators account for 1/3 of the food we eat and are a vital part of our environment.

Solitary bees are also fascinating to watch and a wonderful way to introduce kids to bees, solitary bees have no queen or honey to protect, meaning they are non-aggressive and won't sting.

Made in Cornwall from concrete, using up to 75% waste material from the Cornish China clay industry.
