Traditional Brick & Stone are delighted to present the Seventh edition of our catalogue, which contains the latest collection of colours and textures, produced using both modern and traditional manufacturing methods. With a continued commitment to providing our customers with quality products, underpinned by excellent service, we are confident that we can assist you to select the correct product for your project. This includes devising bespoke blends to address sensitive planning issues or specific customer requirements.

N70 Ecological Range

The Nelissen N70 products provide specifiers and clients with not only an aesthetically pleasing option, but one that contributes towards reducing the environmental impact of using clay facing bricks. They come in a comprehensive range of colours and the available sizes are 215 x 70 x 65mm, 240 x 70 x 40/50mm and 240 x 70 x 65mm formats.

The reduction in the width of the brick has several benefits:

- Reduced raw material usage and CO² emissions during manufacture.
- Less gas utilised per unit during the firing process.
- The reduced weight of the bricks allows for larger volume payloads on vehicles, which will reduce the lorry movements to site.
- Less mortar is needed during the construction process.
- The reduction of 30mm on the width of the brick allows for thicker cavity insulation to be used, reducing the energy consumption of the building.
- Alternatively, the cavity width can remain unaltered, and the size of the internal rooms is increased. This could be an important consideration for high value property situations.

Metallic

Architectural Stone

TBS can make your designs a reality. We have the knowledge and experience to produce both standard and bespoke units to your requirements. We manufacture a complete range of stone, from drycast reconstituted, structural wetcast to Natural Limestone, all of which would enhance the appearance of your project.

Amongst our many capabilities, we provide a complete take off service supported by CAD drawings to confirm your designs. Site visits can be arranged to discuss your requirements in more detail. Should you require further information, or a catalogue, please contact the office or your local TBS representative.
