Hi ScoΣ ,

Many thanks. Please find aΣ ached revised drawings 309, 306, 312, in response to respecΘve invalidaΘon points (2)-(4). Also aΣ ached are site photographs to address point (5).

With regards to trees, point (6), there is only one tree currently on site and it is more than 15m from the proposed development. In light of the very minor scale of proposed works, please would you confirm this is an acceptable response for validaΘon purposes.

The Fire ExempΘon Statement (point (11)) will follow shortly - that being the final point to resolve, with the extra fee to be paid once everything is in order.

Kind regards,  
Chris

Chris ConstanΘ
