

## Model Conditions

The following model conditions are as set out in Appendix 1 of the Institute of Lighting Professionals (ILP) Technical Note 5 “The Brightness of Illuminated Advertisements including Digital Displays” (PLG05/23).

The model conditions include the standard conditions set out in the Town and Country Planning (Control of Advertisements) (England) Regulations 2007 [The Regulations].

The first condition relates to the standard time period of a consent, which unless otherwise specified should be five years, as set out on Part 3 of The Regulations. Please note, following the expiry of the time period an application would benefit from Deemed consent under Class 14 Schedule 3 of the Regulations. As set out in National Planning Practice Guidance (NPPG), conditions cannot be used to prevent the operation of Class 14 unless supported by specific and relevant planning considerations.

The second condition seeks to ensure that the application is implemented in accordance with the approved plans and application documents.

Conditions 3 to 7 represent the five “standard conditions” attached to all applications for advertisement consent, set out in Schedule 2 of the Regulations.

Conditions 7 to 13 are commonly applied to digital consents and have been standardised by ILP with reference to the updated guidance document.

These conditions can be adapted to suite the application proposal, with additional conditions added where they pass the standard tests set out in the National Planning Policy Framework (NPPF).

### Time Period

1. The consent now granted is limited to a period of five years from the date hereof.

*Reason: To accord with Schedule 2 of the Town and Country Planning (Control of Advertisements) (England) Regulations 2007.*
