

Stone wall built up

5-Bar pedestrian gate adjacent to house

Stone planters integrated into garden slope

Stone upstand taken down and slate roof extended over wall to roadside with simple verge detail to match other roofs

Consented steps implemented with new stone planters to mirror the planters on the other side of the basement

Existing basement openings replaced with 2no. openings to reduce the visual scale of the glazing. Buttresses added to break up the elevation and integrated with stone planters which form a green "bookend" either side of the basement.

Consented stone terraces to be implemented
