

Hi Jan,

Thanks for the detailed email below; previously, I looked at the superseded link. Anyway.

I have filled in the attached NDSS for your consideration.

Policy M3- Sustainable Technology, Construction and Performance.

I, Bakhtyar Omar Gahfori, can confirm that I have acknowledged and read through the policy above. I can confirm that I am in compliance with this agreement or a legal ruling. I hereby comply with the policy above that I have analysed, to the level of no more than 110 litres per person per day for all dwellings created.

All residential development must demonstrate delivery of the water efficiency level of at most 110 litres per person per day for all dwellings created. In order to demonstrate high levels of energy performance and water efficiency, non-residential development over 1,000sqm must achieve the BREEAM excellent standard, showing that available water credits have been met.

If anything else is required, let s know.

Regards
Sherwan
