

Sustainability Statement - minor applications

Sustainability standards	Yes	No
A Net zero carbon		
1. Has the building fabric been designed to standards of ultra-low energy demand?		X
The proposal is for the replacement of a conservatory style porch with a masonry walled / tiled roof porch of the same footprint. The proposals shall meet and where possible exceed the requirements of building regulations in terms of fabric performance.		
2. Has thermal comfort and the risk of overheating been assessed and passive design measures been prioritised?	X	
The replacement of the conservatory style porch will greatly reduce the amount of glazing and therefore the risk of overheating		
3. Is the development fossil fuel free?		X
4. Will a net zero operational carbon balance be achieved and 100% of energy consumption delivered using renewables?		X
5. Will embodied carbon emissions be minimised?	X	
B Travel		
1. Is home working supported?	X	
2. Has active travel been prioritised?		X
N/A		
3. Is shared mobility facilitated?		X
N/A		
4. Will electric vehicle charging infrastructure be provided?		X
N/A		
C Water		

1. Will water consumption be minimised?	X	
2. Will water be conserved through rainwater harvesting or grey water recycling?		X
3. Has the flood risk assessment accounted for climate change and is sustainable drainage proposed?		X
The porch will drain as existing and is of compensurate area to the existing porch		
D Waste		
1. Will the construction company be registered with the Considerate Construction Scheme?		X
Unknown at this stage		
2. Will a Site Waste Management Plan be followed and targets set for construction waste recycling and disposal?	X	
3. Will there be safe and convenient access to waste recycling?	X	
E Voluntary sustainability standards		
1. Will non-domestic development be BREEAM certified?		
N/A		
2. Will the development receive a sustainability accreditation and/or follow recognised sustainability principles?		X
F Only for development affecting heritage assets or traditional buildings		
1. Have the heritage value of the building(s) and impact on any heritage asset been appropriately assessed?		
2. Is a whole building approach being taken?		
3. Will responsible retrofit measures be adhered to?
