Good Afternoon Rebecca,

We have re-visited TPO tree this morning.

Please see below details regarding crown reduction and thinning as requested.

Current tree crown spread:

North 7.5 m

South 7 m

East 8.5 m

West 5.7 m

Total crown spread:

North to south 15.2 m

East to west 15 m

Reduce the crown spread by the following:

East by 2.2m or to most suitable growth point

West by 1.5m or to most suitable growth point, leaving a crown spread from east to west of 11.3 m.

Reduce the northern part of the crown spread by 1.5 m and the southern by 1 m or to most suitable growth point, leaving a crown spread from north to south of 12.7 m.

Reduce height of crown by 1.5 m or to nearest suitable grown point leaving a crown height of approximately 21 m.

Reduce over extended lateral growing SE direction by 2 m.

Thin crown to allow more light into the garden.

If you have any further queries, please come back to us.

Kind Regards,
