New for 2012, the 6ft x 8ft Swallow Jay Potting Shed is beautifully and highly practical. The part glazed roof provides a superb growing environment with the rear area giving storage space. Delivered and Installed Free!

3mm Toughened glass is standard on all Swallow wooden Greenhouses and is held in special grooves within the frame and then sealed in place with quality silicone. Inward opening door with mortise locks are also standard.

Each roof vent is supplied with Bayliss XL autovents to automatically open the roof vents when you're not around to stop over heating. You also get a full length of slatted staging down one side of the greenhouse for working on and storing your plants.
