The Cedral Rivendale Fibre Cement Slate Roof Tile is a fully recyclable, durable and visually stunning tile alternative, blending the modern benefits of slate technology with the visual beauty of natural slate. Featuring a riven surface and dressed edge, Cedral Rivendale Fibre Cement Slates are great for roofing projects where a natural look is desired or sustainability is of high priority.

Ideal for both roof and facade projects, Cedral slates are made with more cement and fibres than any other, making them the strongest slates on the market and capable of withstanding the harshest weather conditions. These fibre cement slates contribute to eco-construction and are kind to the environment, allowing you to significantly reduce the carbon footprint of any build. Finely detailed surface and dressed edge, comes in one size only (see specification).

Features

- Environmental product declaration available
- Can achieve an BES 6001 'Very Good' rating
- Full roof system
- Can be used for both roof and façade
- Fibre cement is a 100% recyclable building material
- Low carbon footprint of 13 CO₂e/m²
