Window Replacement to Kitchen and Toilet Area

LUMC is a Grade 2 Listed building built in the 1860's. The Sunday School was added in 1909 and the kitchen windows are the original ones. The toilet window was converted from a coal store which was completed in the 1970's

These are rotten and in danger of falling out. Because of this hazard, the insurance company has instructed us to board up the kitchen windows which has been done

The replacement windows will copy the original design as shown in the diagram previously submitted. They will be casement style, single glazed with ovolo mould and brass fittings. The timber will be sapele and glazed with toughened clear glass and finished with white gloss paint to replicate the design that already exists

There will be no change to the appearance of the external or internal building and only serves to safeguard the Chapel for future generations.
